

uKeg Quick Clean Guide

Watch our How-To-Use video at www.growlerwerks.com/HowTo

1. Remove cap and fill uKeg with hot water

- Repeat 3 times

2. Rinse cap and sleeve with hot water

3. Shake with tap open, facing downward

- Water should come out of tap
- Repeat until water runs clean

4. Fill with hot water and 1 Tbsp. baking soda

- Shake well, tilt until water runs from tap
- Let sit for 10 minutes

5. Empty bottle and rinse all parts.

- Thoroughly rinse tap lock
- Move lock several times during rinse

6. Allow to dry. Store with cap off and tap open in a dry place.

Optional 1. Soak cap in hot water with 1 Tbsp. baking soda

- Remove sleeve from cap
- Place both in hot water, tilt until no more bubbles come from cap
- Turn dial fully in both directions several times under water
- Soak for 10 minutes

Optional 2. Remove cap and rinse

- Shake and rotate until drips stop
